**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. **Claims 1-10** are rejected under 35 U.S.C. 102(e) as being anticipated by Gulliford et al. (US 6,618,355 B1).

Regarding **claims 1-5**, Gulliford discloses a service tariffing in a network (column 1, lines 23-27) comprising:

a subscriber line concentrator provided between said subscriber apparatus among communication apparatuses used for said connection service and said network to record connection history information data relating to a connection history between said subscriber apparatus and said network, and concentrating said subscriber apparatus (column 10, line 63 to column 11, line 15); and

a communication managing apparatus calculating a usage fee of said subscriber apparatus and said subscriber line concentrator lent out, on the basis of said connection

history information data recorded in said subscriber line concentrator among said communication apparatuses used for said connection service (column 12, lines 1-29).

Regarding **claims 6, 8 and 10**, Gulliford discloses a subscriber line concentrator further comprising a receiving unit receiving said connection history information data of each of said subscriber apparatuses from said communication managing apparatus (column 12, lines 30-49).

Regarding **claims 7 and 9**, Gulliford discloses a subscriber line concentrator, wherein said recording unit records said connection history information data obtained from the time that communication between said subscriber apparatus and said network becomes possible to the time that the communication between said subscriber apparatus and said network is cancelled (column 13, lines 13-21).
